SCD Receives 2005 Cornerstone Award from the EDC ***Award recognizes SCD's contribution to Kansas City's economic strength***

(**Kansas City**)—Sustainable Community Development, L.L.C. (SCD) announces it has been chosen to receive a 2005 Cornerstone Award from the Economic Development Corporation (EDC) of Kansas City in recognition of its investment and commitment to the Kansas City community.

The Cornerstone Award program was started more than 20 years ago to recognize the investments by companies in the area and has recently been expanded to include new business construction, renovation projects, neighborhood projects, technological investments, promotion of international trade, housing, community and education projects.

“We are honored to have been chosen to receive this award” said Arthur Brookfield, Managing Partner, Finance & Operations. “Our new facility will accommodate our plan to create new jobs and increase production. In addition, it uses green building techniques, is energy efficient and is a showcase for investors and clients. We are excited to participate in the growing number of life sciences / biotech companies in the Kansas City area.”

SCD will be honored at a luncheon February 22, 2005 at the Marriott Muehlebach Hotel featuring their accomplishments and to be congratulated by Mayor Kay Barnes.

About SCD

Founded in 1998, SCD works with a natural biotechnology that utilizes beneficial and effective microorganism (“EM”) technology. SCD’s approach to introducing EM is two-fold. First, it distributes consumer products for human health and environmental sustainability. Secondly, it works with progressive, environmentally conscious companies to co-develop industry changing applications in the fields of human and animal health, crop agriculture and wastewater reclamation. SCD purchased the 10,000 ft² facility located at 1329 East 9th in Kansas City, because of the unique building improvements that must be made for food grade manufacturing.
