

# ALL SEASONS INDOOR COMPOSTER®

**All Seasons Indoor Composter® Kit** is the perfect starter kit for composting food waste and meat in your home. The kit contains one 5-gallon container and one 1-gallon bag of All Seasons Bokashi™.

**Choose from two colors: Tan (virgin plastic) or Black (75% post-consumer recycled plastic)**

### What's Included:

- Airtight lid for faster fermentation and decomposing
- Spigot allows for easy removal of liquid-rich compost tea to be used for plant fertilizer or household drain maintenance

**Volume Capacity:** 5 US-gallons - .67-cubic feet - 640-fluid ounces.

All Season Indoor Composter is made with high quality plastic. An independent laboratory study found that the plastic used to make the bin does not weaken during the decomposing process. Lower quality bins made with inferior plastics weaken during decomposing, potentially leaching harmful chemicals into your compost, like lead and other heavy metals.

All Season Indoor Composter produces a chemical free compost that will not contaminate your garden.

# ALL SEASONS INDOOR COMPOSTER

## 3 Easy Steps

### All Seasons Indoor Composter kit

is a unique, in-house system used to recycle kitchen scraps into an organic compost soil conditioner. The most effective method of fermenting is through anaerobic (without oxygen) fermentation. This process prepares the scraps for burial in less than half the time of conventional composting methods without any unpleasant odors. This system ferments and pickles your food waste, and even meat.

The **All Seasons Indoor Composter** includes two unique features: the strainer and spigot, which allow the moisture released by the scraps of food waste to be drained out to prevent spoilage. This liquid can be used as a fertilizer for household plants (1:100 dilutions) or to clean your kitchen and bathroom drains (undiluted). The All Seasons Indoor Composter kit can be easily integrated into an indoor environment, making it useful for apartment, school, household, restaurant, business, or wilderness use. Each composting kit comes complete with instructions and one 1- gallon bag of All Seasons Bokashi™.

The **All Seasons Indoor Composter**, used in conjunction with All Seasons Bokashi™, provides the ideal conditions to activate anaerobic fermentation that accelerates the composting process, while eliminating odors and deterring flies.

### The SCD Probiotics® Standard

Despite the recent explosion of probiotics in the marketplace, SCD Probiotics has placed a value on these beneficial microorganisms for quite some time. Inspired to make the world a healthier place, CEO and Founder Matthew Wood began integrating probiotics into a wide spectrum of consumer applications –home composting included--over a decade ago. As SCD Probiotics explored new scientific territories, we forged the way to the future with unmatched probiotic technology.
